

certifier, however, is responsible for these warranties.

III. Certification Approval

The Agency has reviewed this notification, along with comments received from interested parties, and finds that the equipment described in this notification of intent to certify:

(1) Reduces particulate matter exhaust emissions by at least 25 percent, without causing the applicable engine families to exceed other exhaust emissions standards;

(2) Will not cause an unreasonable risk to the public health, welfare, or safety;

(3) Will not result in any additional range of parameter adjustability; and,

(4) Meets other requirements necessary for certification under the Retrofit/Rebuild Requirements for 1993 and Earlier Model Year Urban Buses (40 CFR Sections 85.1401 through 85.1415). The Agency hereby certifies this equipment for use in the urban bus retrofit/rebuild program as discussed below in section IV.

IV. Operator Requirements and Responsibilities

This equipment may be used immediately by urban bus operators who have chosen to comply with either Program 1 or Program 2, but must be properly applied. Currently, operators having certain engines who have chosen to comply with Program 1 must use equipment certified to reduce PM emissions by 25 percent or more when those engines are rebuilt or replaced. Today's Federal Register notice certifies the above-described ECS equipment as meeting that PM reduction requirement. Only equipment that has been certified to reduce PM by 25% or more may be used by operators with applicable engines who have chosen Program 1. Urban bus operators who choose to comply with Program 1 may use the certified ECS equipment (or other certified equipment) until such time as the 0.10 g/bhp-hr standard is triggered for the applicable engines.

Operators who choose to comply with Program 2 and use the ECS equipment will use the appropriate PM emission level from Table A when calculating their fleet level attained (FLA).

As stated in the program regulations (40 CFR 85.1400 through 85.1415), operators are required to maintain records for each engine in their fleet to demonstrate that they are in compliance with the program requirements beginning January 1, 1995. These records include purchase records, receipts, and part numbers for the parts

and components used in the rebuilding of urban bus engines.
